## VAN BOURGONDIEN BROTHERS

from Grower to Consumer Babylon Long Island, N.Y.

## A Message of Importance

THE Dutch government, realizing the chaos in the bulb industry in Holland owing to unfair competition the past few years, has taken a hand in its reorganization to the benefit of grower, exporter and consumer.

We say "unfair competition" and such it was, realizing that surpluses were shipped to foreign countries at any price to compete with legitimate business and in many cases very poor quality being offered to a public not fully acquainted with bulbs, even if the prices were attractive, was decidedly unfair.

Also, considering that numerous copies of cheap literature distributed through the mails, offering bulbs at prices below cost of production by unscrupulous dealers with promises which could not be kept, these all added to the chaos existing everywhere and which was detrimental even to the consumer.

In view of the above, now more than ever, do not be misled by cheap offers or impossible promises but let our conservative mind again realize the fact that the old slogan

### "A Good Article Is Worth The Price"

should once more lead us to stability, quality, service and peace of mind through gardening, to the benefit of the people of this great country of ours, the United States of America, and of the entire world.

We grow Tulips, Hyacinths, Daffodils, etc., in quantity especially for our select trade.

## Free Delivery on All Bulbs

All merchandise traveling any distance usually becomes expensive on account of the transportation charges, which have to be added to the price of the goods.

When you agree to our competitive prices for the finest quality bulbs, you have no further expenses, as we agree to deliver them in your home town charges prepaid if full cash accompanies the order.

The cost of this service is not added to our prices, but deducted from our revenue in order to back our slogan:

General Office at Hillegom, Holland.

Holland Nurseries.

Babylon, Long Island, Packing Houses.

## FRENCH BULBS for Early Forcing

### AMERICAN GROWN

The two varieties named below have been grown for us in the United States and are due to arrive at our packing house in August. They can be delivered upon arrival or at the time your order is received, for immediate planting in order to have early flowers. Follow the directions given with each variety, and you will have an abundance of dainty, attractive flowers in early winter. We start our book with these bulbs as they are the earliest flowering bulbs we offer.

### Lilium Candidum

This is the exquisite Madonna Lily, which produces a large mass of snow-white flowers on straight stems. Plant these bulbs in the open in September or October, and protect them well from frost, as they are not extremely hardy, and during May or June you will have an abundance of flowers. Can also be planted in pots and by putting them in a cold frame for 3 months, well protected, then taking them into a greenhouse, the same success will be yours. Jumbo bulbs only, 35c each; \$3.50 per doz.; \$25.00 per 100.

Golden Yellow Narcissus.

Paper-White Narcissus.

### Paper-White Narcissus

Suitable for Growing in Water and Gravel, Sand or Fibre

We handle only the Giant Grandiflora variety, which is a great improvement over the ordinary Paper-White Narcissus. It can be had in bloom from Christmas until Easter, either in pots, bowls or boxes. Upon arrival, plant them immediately, if wanted early, and put in a cool place in cellar or pit, free from frost. When well rooted they can be taken into heat, and if watered

freely they will produce an abundance of beautiful blooms. They are not hardy. Jumbo or Exhibition Size, \$1.00 per doz.; \$7.50 per 100; \$70.00 per 1000.

### Golden Yellow Narcissus Soleil d'Or

Soleil d'Or resembles the Paper-White Narcissus very much, in habit, but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paper-White Narcissus. We expect to have some very fine stock of this variety to meet the steadily increased demand of the past few sear sons. Do not forget to order a few and get acquainted with this wonderful flower. We offer only the Exhibition Size, \$2.50 per doz.; \$18.00 per 100; \$160.00 per 1000.

## GIANT DARWIN TULIPS

(May-Flowering)

### The Pride of the Garden

These Tulips have created a real sensation for the past few years, and one really does not wonder when seeing them in full bloom. They got their reputation through merit alone. They are most brilliant in color and of the greatest variety of shades Each flower is extremely large, thereby producing a most gorgeous show in any garden, either in beds, borders or among shrubbery. With the exception of a few varieties, they are not very satisfactory indoors, and one must be an expert grower to flower them in the house at all, but they never fail outdoors.

## for Outdoor Culture

If soil is loosened about 12 inches deep before planting and if possible mixed with leaf mold or well-rotted stable manure the best results can be expected. Tulips should be planted 4 inches below the surface of the ground. Cover them after the ground is frozen, although covering is not strictly necessary. Remove covering in the spring when tops are approximately 4 inches high.

### Culture for Indoors

For indoor culture see our directions, which we supply with each order.

## Old English COTTAGE TULIPS

May-Flowering

The Tulips belonging to this class owe their name to the fact that many of them had been found growing about country houses and cottages in England and France generations ago. In the hands of skillful gardeners, and by careful hybridizing and selecting the best soil that could be found, the selection has become very extensive. All imaginable colors are now represented in this class. They all have long stems and very graceful formation and are therefore unsurpassed for the garden and excellent for cutting.

## Majestic BREEDER TULIPS

These Tulips, although formerly listed among the Cottage varieties, form a distinct class in themselves, being an unbroken form of the old-time Florist's Tulip. The Breeders, strange to say, were discarded by their originators, the old Dutch gardeners, because they had no stripes or feathers, and until recently they were placed in the background of borders and other obscure places. Now that a taste for art eolors has been awakened, together with a desire for bronze, brown, and buff tones, attention is again drawn to these old-fashioned Tulips, and within a very few years they have beeome the most popular of all the late Tulips.

They well deserve their popularity, not only for their peculiar and artistic coloring but for their lasting qualities as well, for this makes them unusually well suited for garden deeoration, slow foreing, and eut flower use. In size of flower, length and strength of stem, and general beauty they far excel the Darwins.

This elass of Tulips will prove very interesting on aeeount of their peculiar forms and different habits of growth.

## **HYACINTHS**

Hyacinths will grow in any good soil but they prefer a rich light soil. The method of growing is as simple as that of Tulips but when planted in pots the top of the bulb should be level with the surface of the soil, and plenty of water should be given when in the house or conservatory. When planted outdoors they require 6 inches or more of cover (preferably light) after the first sharp frost, as they are not as hardy as Tulips, the cover to be partly removed after the middle of March if there is no snow.

## Miniature or Dutch Roman Hyacinths

These are the Hyacinths used for growing in bulb pans, and if planted 10 to 12 bulbs to an 8 or 9-inch pan, they cannot They are apparently small bulbs but in combe surpassed. parison to their size they produce immense flowers. On account of their low price and splendid results, they are very much in demand for house culture. By planting only one kind in a pan, the best results can be obtained, as then they produce an even growth. By following the same cultural directions as given for the Hyacinths, failure is impossible. They are also greatly used for bedding.

## **NARCISSUS** or DAFFODILS

In order to have a beautiful bulb garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States and it is small wonder that the demand is doubling every year. They are not only excellent for outdoors but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut-flower purposes with every American gardener. We have compiled a list (as short as we could make it) of the best and most attractive varieties for indoor, and exhibition purposes, and it is complete and easy to select from.

Culture. The same as Tulips, although they should be planted as close as possible in the open or pans. After active growth commences, give plenty of water.

Culture Outdoors. They should be planted so that the top of the bulb is at least 5 inches beneath the soil. A little protection should be given during severe winter weather, although they are perfectly

In our descriptions we use the following terms: Perianth—the outer petals of the flower. Trumpet—the long cup or trumpet shaped center. Crown or Cup—the short or flat center.

YELLOW TRUMPET varieties have trumpets which as a rule are longer or as long as the perianth segments (petals). They usually have a light or deep yellow perianth with a trumpet of deeper yellow.

BICOLOR varieties have creamy or pure white perianth segments and yellow trumpets.

BARRI varieties have light or deep yellow perianth segments and an expanded crown instead of a trumpet, which is light or deep with red or orange edge.

INCOMPARABILIS varieties have light or deep yellow segments, a crown of light or deep yellow very similar to a short trumpet.

LEEDSI varieties always have white segments, while the crowns are white or light yellow. They are very dainty.

POETICUS. Snow-white segments, crowns usually heavily rimmed orange or scarlet with a green eye in center of crown.

POETAZ. Cluster flowered in white, light or deep yellow. Some varieties have orange or red rimmed small crowns.

JONQUILS. Usually bear small flowers in small or large clusters on one stem, and usually are sweet scented.

Daffodil Horace.

## Imported and Native **DAFFODILS**

### Wonderful varieties among the always popular species of early spring flowers

ALBATROSS. (Barri). White perianth and pale citron yellow cup, edged orange red. Doz., \$1.00; 100, \$6.00.

AMETHYST. (Leedsi). A snowy white variety that is full of life and very beautiful. Each, 50c; doz., \$5.50; 100, \$40.00.

AMBASSADOR. (Incomp.). Large pure white perianth with well-formed petals. Creamy white cup. One of those gorgeous novelties hard to do justice in a description. Each, \$1.00; doz., \$10.00; 100, \$75.00.

## DAFFODILS for

## Naturalizing

Pheasant's Eye Daffodils. This variety will be among the assortment for naturalizing.

UNDREDS of thousands of Daffodils are used yearly for this purpose, because when once planted they continue without any care to give you immeasurable joy year after

Numerous varieties have proved very successful for this purpose and we will use no others. Practically all types of Daffodils contain some varieties suitable for this purpose, thereby increasing the number of varieties and adding greatly to the desire of naturalizing Daffodils.

Only sizes which are most desirable for naturalizing without continuous care are sclected for your favorite garden spot. "The natural garden."

Practically any soil has been found suitable, but when planted under and among trees and in woodlands, the leaves of the trees should not always be removed, as taking away this natural food will not only injure your trees but also will prevent the Daffodils from producing as they

Only varieties having proved to be hardy are selected for this purpose.

Plant at least 8 inches deep but avoid places where water may collect at any time as they like drainage.

Try to plant them before October 15th or shortly thereafter, but place your order early as the demand is increasing for these bulbs at this special low price we have adopted, and we cannot take orders for less than 100 bulbs.

BULBOCODIUM, CONSPICUUS (Hoop-Petticoat). This unusual little Daffodil is regaining its popularity, and deservedly so. Golden yellow. Very dainty. Each, 35c; doz., \$3.50; 100, \$25.00.

MINOR. The smallest yellow trumpet Daffodil outside of Minimus, which last variety is not quite as satisfactory. Each, 35c; doz., \$3.50; 100, \$25.00.

Campernelli Odorus Rugulosus.

### Snowdrops.

### Muscari

(Grape Hyacinth)

The foliage of this plant is very similar to that of Scilla, but the flowers are of an entirely different form—grapelike clusters closely set-and are wonderful cut flowers. Always exquisite when naturalized.

ALBA. White. 50c per doz.; \$3.50 per 100; \$33.00 per 1000.

BLUE BIRD. An immense improvement over the former variety, the flowers being twice as large and growing taller, and of a delightful heavenly blue. 80c per doz.; \$6.00 per 100.

HEAVENLY BLUE. 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

## Miniature Bulbs for Rock Gardens

### Snowdrops

(Galanthus)

Everybody knows the Snowdrops; with their little white bells coming through the snow very early in the spring, practically the first flower to show itself after the dreariness of winter. It is a wonderful bulb for naturalizing and for every garden.

NIVALIS (Single). 40c per doz.; \$3.00 per 100; \$30.00 per 1000. NIVALIS (Double). 50c per doz.; \$3.60 per 100; \$35.00 per 1000.

### Fritillaria Meleagris

Singular, dwarf, spring-flowering plants, bearing large, pendent, bellshaped flowers of various colors, in yellow, white, black, purple,

striped and splashed, and checkered in the most curious way. They are invaluable for pot culture, and exceedingly pretty when grown in large groups in the garden border or wild garden in a dry situation.

MIXED. Select mixtures. 50c per doz.; \$3.50 per 100; \$33.00 per 1000.

### Scilla

Scilla sibirica naturalize splendidly, are cheap and so can be planted liberally, and everyone who has a garden should provide for the time when they will be excluded.

SIBIRICA, BLUE. 45c per doz.; \$3.50 per 100; \$33.00 per 1000.

SIBIRICA, SKY BLUE. A trifle lighter blue than the former with large flowers of a most beautiful heavenly blue color. 60c per doz.; \$4.00 per 100; \$36.00 per 1000.

Muscari.

### Chionodoxa

(Glory-of-the-Snow)

An early flowering spring bulb for borders or rockery. Produces flower spikes bearing ten to fifteen scilla-like flowers. Perfectly hardy and should be planted close together for effect.

> LUCILIAE. Deep blue, with a white center. Selected mother bulbs, 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

> SARDENSIS. Deep blue. 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

Eranthis Hyemalis.

### **Eranthis Hyemalis**

(Winter Aconite)

Early in spring the golden blossoms look charming, resting on an emerald-green cushion of leaves and forming a striking contrast to the Snowdrops, Scillas and Chionodoxas. The foliage remains long after the flowers, making the plant especially valuable in moist situations, such as under trees, which the Winter Aconite enjoys, and where few other flowering plants will thrive. 3 to 8 inches high. 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

Scilla Sibirica.

Scilla Campanulata. Rose Queen.

## Scilla Campanulata

All the varieties of Scilla campanulata are splendid for naturalizing because they will flower in shady places. All have bells like small Hyacinths, forming long and graceful spikes.

CAMPANULATA ALBA MAXIMA. Large, pure white. 50c per doz.; \$3.50 per 100.

BLUE QUEEN. Large, bright blue. 50c per doz.; \$3.50 per 100.

ROSE QUEEN. Soft lilac-rose. 50c per doz.; \$3.50 per 100.

## **ENGLISH IRIS**

(BULBOUS)

### For Outdoor Planting Only

For years this most beautiful of all bulbous Iris was practically non-existent in this country and could not be imported. Fortunately we located a farm in Michigan where they can be grown very successfully and years of persistent cultivation has made us a stock equal to any in this country.

They are grown in mixed colors containing numerous shades of blue, purple, and white veined and feathered with opposite color.

We want to interest every Iris lover in this most beautiful bulbous Iris and we have dropped the price within reach of everybody.

Price: Per doz., 50c; per 100, \$3.50.

## **DUTCH IRIS**

VIOLACEA GRANDI-FLORA. (Pal.). S. rich blue; F. violet-blue JAPANESE IRIS

This queen of the large-flowering Iris is very attractive. It flowers a little later than the German Irises, which adds greatly to its popularity. The flowers are of an enormous size and there are single and double varieties, both being equally attractive and suitable for cut flowers, as they really develop into a more perfect bloom if they are cut just before the bud opens and placed in the house in fresh water. The best time to plant these Irises, like all other Irises, is September, to allow them a fair time to make new roots before the winter sets in.
